PLANER BLADE

Planer Blade on the Junior Peterson

DRESS YOUR WIDE BEAMS AND SLABS WITH A PETERSON PLANER BLADE!

A Peterson Planer Blade is an integral tool for dressing wide beams and slabs cut with your Peterson Sawmill and Clip On Slabber. Cut and dress much larger beams than with any other sawmill, and maximise your earning potential when custom sawmilling.

The Planer Blade is mounted in place of the standard mill blade and skims over your sawn beam or slab for planed results in just one pass! It is perfect for thickening and levelling your slabs by removing any warps and ridges after drying.

CAN BE FITTED TO:

-  Junior Peterson
-  All Terrain Sawmill
-  Winch Production Frame
-  Automated Swingblade Mill

INSTALL TIME:

-  Under five minutes

Complement your Planer Blade with Peterson's Sanding Kit for the ultimate finish!
